ARTS, LETTRES, LANGUES

ARTS, LITERATURE AND
LANGUAGES

Undergraduate program in Visual Arts. Licence Métiers de la Bande dessinée

Visual Arts. Cartooning. Graphic Novel.

Course title : Practicing Cartooning and Graphic Novel (2 ECTS/semester)

Professor : Justin WADLOW - justin.wadlow@u-picardie.fr

L3
5 & 6
semesters

18h of
TD/semester

Course presentation

Every class is divided in two: first the study of some of the most inspiring comics or graphic novels linked to the theme being approached, then an assignment for the following week in which the student is asked to produce some pages, this work being then discussed with the whole class. The English language is thus practiced as both a vehicle for understanding as well as for practicing the art of cartooning.

Evaluation

Both written and oral marks during the class.

Recommended bibliography

No specific bibliography is required.

Undergraduate program in Visual Arts. Licence Métiers de la Bande dessinée

Visual Arts. Cartooning. Graphic Novel.

Course title : English Speaking Cartooning and Graphic Novels (2 ECTS/semester)

Professor : Justin WADLOW - justin.wadlow@u-picardie.fr

L3
5 & 6
semesters

18h of
TD/semester

Course presentation

During the third year of our undergraduate program in Visual Arts, the students are offered the possibility to specialize in Comics and Graphic Novel, alongside illustration and animation. This special year covers a wide range of options: creating comics through workshops, understanding the history and esthetics of comic art, as well as editing and setting-up shows dedicated to Comics. A strong emphasis is placed on the students 'participation in the festival « Les Rencontres de la bande dessinée d'Amiens in June ».

More specifically, this class "English Speaking Comics" is thought of as an introduction to English speaking cartooning, and tackles a wide range of topics, from the many techniques specific to cartooning, to the study of specific genres.

Evaluation

Both written and oral marks during the class

Undergraduate studies in performing Arts

Performing Arts

Course title : Atelier Techniques de l'acteur (2 ECTS)

Professor : Justin WADLOW - justin.wadlow@u-picardie.fr

L2
3th semester
30h of TD

Course presentation

The aim of this class is to provide students with the opportunity to practice acting using the original language in which the plays were written and performed: English, French, British, American or from the Commonwealth.

The variety of plays changes every year since it is based on the works performed locally in Amiens, in the various venues of the city, thus providing a better interaction with directors and actors involved.

The class also focuses on presentation and discussion with the students of plays they have seen lately, upgrading their critical as well as language skills in the field of the performing arts.

Every week, students are therefore asked to read the plays, choose an excerpt and then perform it on stage.

Evaluation

The marks are given at the end of the class during a final exam where the students are asked to perform

Art History

Course title : EC3 - Histoire de l'art moderne - Fashion and clothes in Europe (16th-20th centuries) (5 ECTS M1 & 9 ECTS M2)

Professor : Philippe SÉNÉCHAL - philippe.senechal@u-picardie.fr

M1 or M2
2nd or 4th
semesters
18h of lecture

Course presentation

We will study the culture of appearances from the Medici to Yves Saint Laurent and focus on artistic, social, economic and anthropologic features of fashion and clothes. How did fashions spread ? What was the interplay between clothes and art ? between costume, theater and film ?

Evaluation

Written 15-page essay or 20mn oral presentation on a specific case.

Recommended bibliography

Course title : Business Models (3 ECTS)

Professor : Samaneh KAKAVAND - samaneh.kakavand@u-picardie.fr

**M2
Year**

14h of lectures and 7h
of tutorial secessions

Course presentation

The objective of this course is to master the design of business models using a design-thinking. Business model analysis is important for startups, new and established businesses which need to discover, defend or evolve their business models. This course introduces a structured way to think about, analyze, and develop a sound business model. Upon completion this course, the students will have a general understanding of the current state and trends in the design of business models (Canvas) and value propositions. More specifically, the students will be aware of the potential contribution of conceptual and design-oriented research for improving the formalization and the design of business models. The last part corresponds to the exploration of how design-thinking techniques such as prototyping, customer insight and storytelling might contribute to improve the design of strategies and business models.

Course title : In-Store Marketing and Visual Merchandising (4 ECTS)

Professor : Benjamin KAKAVAND - benjamin.kakavand@u-picardie.fr

Course presentation

The major objective of in-store marketing is to learn how to apply relevant visual merchandising standards and guidelines. Through this course, the students specifically learn how to recognize the elements of in-store marketing, use and understand suitable retail terminology, understand and utilize standards for retail store maintenance, understand and utilize standards for sign usage and utilize standards for permanent product placement. Agenda as follows :

- Introduction to Merchandising
- Three different aspects of merchandising
- Merchandising of the producer
- Merchandising of the distributor
- E-Merchandising
- The role of the merchandiser
- Merchandising planning process
- In-store promotions
- Trade marketing
- Price markdowns
- In-store advertising
- Techniques of visual merchandising

Evaluation

Final exam and continuous assessment (case study presentation / group work)

Recommended bibliography

- Nordfält, J. (2011), In-store marketing : On sector knowledge and research in retailing (2nd ed.), Sweden : Forma Magazine AB.
- Castaldo, S., Grosso, M. & Premazzi, K. (2013). Retail and Channel Marketing, Cheltenham, Edward Elgar.

Course title : Cooperation and business networks (5 ECTS)

Professor : Mathieu DUNES - mathieu.dunes@u-picardie.fr

Course presentation

The students will acquire basic knowledge of the main theories concerning cooperative and networks strategies between firms and single agents and will be able to assess the feasibility of individual or collective courses of actions. The first part of the course is dedicated to organizational cooperations and business ecosystems. The second part will discuss managerial and organizational procedures through the axis of the supply chain management theory. Finally, emphasis will be put on the clustering approach by questioning the French position. At the end of the course students will have acquired :

- the knowledge needed to identify the benefits but also the risks associated with starting cooperative relationships ;
- the ability to apply the knowledge gained from operational contexts such as joint ventures or strategic alliances ;
- the critical capacity to compare the different alternatives and make decisions rationally justified.

Evaluation

Final exam, case study

Course title : Strategic management and firm structure (5 ECTS)

Professor : Mathieu DUNES - mathieu.dunes@u-picardie.fr

Course presentation

The students will :

- Acquire basic knowledge of main theories and business practices concerning corporate strategy
- Have a global perspective of firm activities from a top management viewpoint
- Be able to assess the feasibility of individual or collective courses of action analyzing specific business cases.

More specifically, students will understand : 1/The dynamic relationship between strategy and organizational structure; 2/The technics of competitive and corporate analysis

Evaluation

Course title : International Environment (Globalization of International Trade) (2 ECTS)

Professor : Benjamin KAKAVAND - benjamin.kakavand@u-picardie.fr

Course presentation

This course is about international trade, theory and policy. The course aims to explain patterns of world production and trade and questions international trade benefits. The course also explores the phenomena of outsourcing and international mobility of labor (immigration) and capital (Foreign Direct Investment (FDI)). The course analyzes and compares instruments of trade policy and evaluates their impact on domestic and international welfare. Finally, the course studies the world trading system, including the World Trade Organization (WTO) and international trade agreements. Agenda as follows :

- Brief History Development of International Trade
- Nature and Scope of International Trade
- Basic Concepts and Reasons for International Trade
- Globalization of Markets and Production
- Advantages and Disadvantages of Free Trade
- Protectionism
- World Trade Organization (WTO)
- Multilateral Trade Negotiations
- Popular Trade Agreements in the World
- Various Forms of Regional Trade Agreements

Course title : Introduction To Modern Economics (2 ECTS)

Professor : Justin WADLOW Justin.wadlow@u-picardie.fr

Course presentation

This class aims at providing a broad view of the basic economic concepts, and how these can apply to a better understanding of some key political and historical moments such as the birth of the Fordist Model in the 20s; The Great Depression of the 30s, how it started and how it was defeated; or The Conservative Revolution of the 80s and the return of The Free Market Economy.

In doing so, a wide range of documents will be covered, from movies to songs, from economic text-books to photography.

Evaluation

Two written evaluations will be provided during the course of the class.

Course title : Design of Supply Chain (3 ECTS)

Professor : Frédéric GAUTHIER - frederic.gauthier@u-picardie.fr

Course presentation

The set of decisions that operations managers make; The trends and challenges facing operations management; The customer-supplier relationships between processes, to understand the escalating importance of international logistics as competitiveness becomes increasingly dependent on cost efficiency, to learn about materials management and physical distribution, both part of international logistics.

Aims

- to learn why international logistics is more complex than domestic logistics
- to see how the transportation infrastructure in host countries often dictates the options open to the international manager
- to learn why inventory management is crucial for international success
- to assess distribution performance through inventory management policy
- to learn using indicators for that purpose
- to learn how to use main distribution policy available for a company worldwide, a global company, small to medium size and large company
- to identify main distribution channels worldwide and the way to weigh them

Themes

Operations – Logistics fundamentals (strategy) – Inventories Management – Logistics of distribution

Evaluation

Course title : Import Export Management (3 ECTS)

Professor : Frédéric GAUTHIER - frederic.gauthier@u-picardie.fr

Course presentation

This class enables students to know the basics of exporting.

Exporting has become an important component in company strategy: the fact that markets may stagnate, international competition, the world being shared between those who have the knowledge, those who have low-cost manpower, and those who have the purchasing power, the search for profitability are all pushing companies to hunt for other markets abroad.

Import management in the same way includes however an increased responsibility to ensure supply chain resilience.

Evaluation

Grouping works 50% mark and individual examination 50% mark

Course title : Security Supply chain Management (3 ECTS)

Professor : Frédéric GAUTHIER - frederic.gauthier@u-picardie.fr

Course presentation

Learning objectives are :

- To assess risk issues related to companies
- To understand ethics and integrity values
- To list main methods of risk management within the company
- To apply risk management process
- To understand international customs regulation environment
- Identifying players in customs process
- To manage customs rules
- To connect these rules to security supply chain management goals
- To manage S.C.R.M. according to customs principles
- Define uncertainties that are particularly relevant when designing global supply chains
- Explain different strategies to mitigate risk
- Understand the methods to assess supply chain decisions under uncertainty

Through studying the Security Management scope than identify illegal trade as well as customs regulation as a tool method and eventually identifying and using proper solutions

Evaluation

Grouping work 30% mark, individual research work 20% mark and individual exam 50 %

Educational Sciences

Course title : New definition of the common good and « school modernity » : international and sociopolitical approach (5 ECTS)

Professor : Sarah CROCHÉ - sarah.croche@u-picardie.fr

Course presentation

In education, the debate between a perspective of democratic equality and performance is still ongoing, but new definitions of the common good are being stated. The importance of migrations, the awareness of the new frontiers which are dividing societies have led to the issue integration being projected once more to the forefront by looking at it in a context of recognition of differences. Other evolutions have led us to return to bases which we believed to be well established; such as the division between science and faith, the relations between humans and nature, the definition of sexual identities... The reference spaces are also evolving: globalization has reformulated traditional issues such as that of equality and is proposing new definitions of citizenship, questions are being developed around the universality of Human Rights and the respect of childhood, and ecological concerns have prompted us to think about development on a larger scale... Each of these movements questions the definition of the common good and the “school modernity”.

The aim of the course is to create a space of encounters and confrontation in which the conditions of the emergence of these movements and their consequences are analyzed by thinking together about the economic and social situations of the countries of the North and the countries of the South.

The analysis leans on different theories: Foucault's theory, the sociology of translation, the cognitive approach to public policies, governing through instruments ...

By the end of the course, students will be able to:

- know the new international educational policies
- analyse one educational policy (with one theoretical model presented during the course)
- apply their developing skills in a community setting

Partners: researchers from different universities in and outside France. I will provide this course in parallel with an international seminar (on the same subject) in which the M2 students will be invited.

Evaluation

Small group work (outside class), presentations and discussion in class.

« Survey sciences, ethnography and social theory » field

Course title : Reading Anthropology in English (3 ECTS)

Professor : Sophie CHEVALIER - sophie.chevalier@u-picardie.fr

Course presentation

This series of two-hours seminars aims to increase students' ability to draw on literature in English relevant to their own master's thesis. For every seminar the organizer will select an anthropological text for each student, and they will report to the group on its relevance to them. The focus will be on the definition and use of key concepts.

Evaluation

Students are expected to summarize the content of works in English that they have read for inclusion in their thesis bibliography.

NB

This class is not taught in English though the major texts used are available in English.

« Materials for Energy Storage and Conversion + » Master degree

labelled by the Erasmus+ Programme as an Erasmus Mundus Joint Master Degree from 2018 to 2024

The MESC+ Erasmus Mundus Joint Master Degree is a 2-year programme in Materials Science and Electrochemistry, fully taught in English, among 5 Universities in 4 European countries: Warsaw University of Technology in Poland, Université Toulouse III Paul Sabatier and Université de Picardie Jules Verne in France, University of Ljubljana in Slovenia and Universidad del País Vasco in Bilbao, Spain.

It involves as well Drexel University in USA and Deakin University in Australia, a European Research Institute (ALISTORE), the French Network on Energy Storage (RS2E), the Slovenian National Institute of Chemistry (NIC) and a leading Research Center in Spain (CIC Energigune). It is run by a number of world-renowned members of Research Laboratories in the field of energy-related materials who work closely together through several European and trans-European projects.

Curriculum of MESC+

Semester 1 in Poland		330h	30 ECTS	Semester 3 in Slovenia, or Spain, or France		30 ECTS

« Agrosciences, environment, landscape, territories and forests » Master degree

« Ecology, agroecology, biodiversity » field

Course title : Inter-specific relationships (3 ECTS)

Professor : Anas CHERQUI - anas.cherqui@u-picardie.fr

M2

1st semester

12 conferences

Course presentation

The lessons of this module are structured in the form of scientific conferences by researchers from university or French research organizations such as CNRS and INRA. Various research topics are presented on the interactions between organisms such as predation, parasitism, symbiosis, mutualism. These relationships lead to permanent evolutionary races (Theory of the Red Queen of Van Valen).

Program :

- Physiological and behavioral adaptations of the relations between organisms (mimetism, camouflage, molecular defense, chemical defense, etc.)
- Physiological and behavioral regulation of parasites on their hosts
- Avoidance mechanisms used by parasitoids to escape the host defense system
- Adaptations to the lifestyle of phytophagous plants
- Mechanisms of defenses in plants against the attacks of phytophagous insects and phytopathogens (fungus, virus, etc.)
- Symbiotic interactions (symbiotic bacteria and viruses)

Evaluation

Short abstract : for each conference, an abstract is requested in the form of a 350-word summary (+/- 10%) in a single page.

« Agrosciences, environment, landscape, territories and forests » Master degree

« Ecology, agroecology, biodiversity » field

Course title : Stress Resistance : defence mechanisms among invertebrates and plants (3 ECTS)

Professor : Christine RUSTERUCCI - christine.rusterucci@u-picardie.fr

Course presentation

The development of biologically integrated control depends on physiological factors of the plant and the invertebrate that are interacting.

The goal of this course is to understand how plants and invertebrates react to environmental stresses analysing their physiological, cellular and molecular mechanisms.

Pré-requis: Cells structures and signaling pathways, biochemistry bases (mains cells compounds, technics of protein analyses...).

Programme :

The development of biologically integrated control depends on physiological factors of the plant and the invertebrate that are interacting.

The program will include:

- Plants responses to stresses from signal perception to adapted responses of the plants (receptors, diversity of signals, defence proteins, secondary metabolites, RNA-interference). The avoidance of plant defence by insects or pathogens will be discussed in the context of co-evolution (Mme Rustérucchi).
- Invertebrate responses to biotic stresses from cellular and molecular mechanisms (phagocytosis and encapsulation, production of antimicrobial peptides, phenoloxidase system) to the success against invaders (M. Cherqui). Experiments will be performed using parasitoid and insect host interactions (M. Eslin).

Skills: Be able to appreciate the role of new methods or products proposed to improve the protection, the quality and yield of vegetable crops, in the context of integrated control of pests and diseases.

Evaluation

Documents analyses and synthesis

Recommended bibliography

Course title : Teaching of visual arts at primary school (2 ECTS)

Professor : Rachel VIARTEIX - rachel.viartheix@u-picardie.fr

Course presentation

In this course, students will develop specific knowledges through varied artistic practices, discover various styles, forms and periods in Art and transform theoretical contents into learning object.

In visual arts and in the study of history of arts, students have to articulate theory, practice and culture to:

- understand, question and analyse different artistic creations that rely on specific notions of the programs;
- create tools to decode and interpret different creations using a specific vocabulary;
- develop the teaching of art history in an interdisciplinary approach in connection with the programs;
- discover cultural institutions.

Themes

Programs (Cycle 2 and Cycle 3) : The 6 big questions / and its different executions

Organization

- Practice (English) : varied artistic practices base on the different questionings of the programs
- Elaborations of learning situations (French) / Teaching sequences and culture / Analyse (English)

Evaluation

- Practice : Evaluation based on competences (in English)
- Culture (English) (rely on the learning situations) / Evaluation based on competences (in English)
